**Notification**  
**Initiation of Corrective Measure Assessment**  
**Coal Combustion Residual Rule Compliance**

Facility  
Healy Power Plant  
2.5 Mile Healy Spur Road  
Healy, Alaska

June 18, 2018

## Notification

An assessment of corrective measures has been initiated at the Healy Power Plant. This notification has been documented in GVEA's facility operations records to satisfy the requirements under §257.105(h)(9) of the CCR Rule, and posted to GVEA's CCR Website in accordance of §257.107(h)(7).

Between April 2016 and October 2017, groundwater monitoring was performed to comply with U.S. Environmental Protection Agency's (EPA's) Coal Combustion Residuals (CCR) Rule<sup>1</sup> for the four CCR units at the Golden Valley Electric Association, Inc. (GVEA) Healy Power Plant. Groundwater samples collected from the groundwater monitoring system were analyzed for both Detection and Assessment Monitoring constituents listed in Appendix III and IV of the CCR Rule. Because the 2016 and 2017 groundwater samples were analyzed for Appendix IV constituents, the GWPS were established and a statistical comparison of the detected Appendix IV constituents with the GWPS was already performed, as discussed in the *Groundwater Monitoring and Corrective Action Report* dated January 2018 (amended April 2018).

Appendix IV constituents were detected at a statistically significant level above the GWPS at several monitoring wells and include antimony, arsenic, lithium, molybdenum, and selenium. As such, GVEA initiated an assessment of corrective measures on May 30, 2018 in accordance with §257.96.
