GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.

RATE SCHEDULE T-2

**Reactive Supply and Voltage Control
from Generation Sources Service**

In order to maintain transmission voltages on the Transmission Provider's transmission facilities within acceptable limits, generation facilities use (or absorb) reactive power. Thus, Reactive Supply and Voltage Control from Generation Sources Service must be provided for each transaction on the Transmission Provider's transmission facilities. The amount of Reactive Supply and Voltage Control from Generation Sources Service that must be supplied with respect to the Transmission Customer's transaction will be determined based on the reactive power support necessary to maintain transmission voltages within limits that are generally accepted in the region and consistently adhered to by the Transmission Provider.

If not supplied by generation facilities, Reactive Supply and Voltage Control from Generation Sources Service is to be provided directly by the Transmission Provider or an approved third party that performs this service for the Transmission Provider's Transmission System. The Transmission Customer must purchase this service from the Transmission Provider or an approved third party that performs this service for the Transmission Provider's Transmission System. The charges for such service will be based on the rates set forth below:

Reactive Supply and Voltage Control Rate	=	\$ 0.6503 per month of Reserved Capacity in kW OR	R
		\$7.8033 per year of Reserved Capacity in kW	R

At this time, the Transmission Provider has not identified a cost for providing separate Reactive Supply and Voltage Control from Generation Sources Services. There will be no separate charges for such services until such time as this Tariff is amended to include such charges.

Pursuant To: **U-17-007(12)**

Effective: November 1, 2018
